ACHIEVEMENT

How can I make a good structure in Laravel project

The article discusses the HMVC (Hierarchical Model View Controller) pattern as an approach for structuring Laravel projects. It emphasizes dividing components like blog and forum into separate MVC modules to facilitate independent development while maintaining unified functionality.

Multi Language App in professional way with Laravel

This article discusses creating a multi-language app in Laravel using the "mcamara/laravel-localization" package for language detection, smart redirects, and routing. It also covers integrating "Spatie Translatable" for dynamic JSON columns and "Spatie Sluggable" to implement multi-slugs with language support.
